[Click here](#) for downloadable instructions.

Read all instructions carefully. 1/2" seam allowance included in all measurements.

Finished size: 8" High

Materials Needed:

1/2 Yd fabric (74664-S Bubbles)

Lampshade

Spray Adhesive 1 Can

Craft Glue

1. Trace the shape of the lampshade on to paper by drawing a straight line on the paper to start at. Then roll the shade slowly from this line around, tracing the bottom edge. Re-roll the shade over the bottom edge and trace the top edge. Cut the paper out and make sure it fits. Trace the paper pattern on to the wrong side of the fabric and cut out 1" larger on all sides. **Illustration 1**

2. Spray the shade with the spray adhesive. Place the wrong side of the fabric on the shade starting at the seam. Press the fabric around the shade smoothing out any wrinkles as you go.

3. Trim the excess off the back where the seams meet leaving 1/2" to fold and glue over other side.

4. Trim the top and bottom fabric on the shade about 3/4" from the wire edge. Place glue around the inside wire of the shade and glue the raw edges over the wire to the inside.
